Education

Carleton University School of Computer Science **CGPA: 10.20/12.00**
Bachelor of Science in Computer Science, AI and Machine Learning, Cybersecurity — Minor in Business *Expected 2028*

Relevant Coursework

- Data Structures
- Algorithms
- OOP
- Systems Programming
- Probability Models
- Discrete Structures
- Linear Algebra
- Web Development

Experience

Arab Textile Industries co. **September 2024 – September 2025**
Web Developer Intern *Cairo, Egypt*

- Designed and implemented a responsive e-commerce storefront using HTML, CSS, and JavaScript in a Windows-based development environment.
- Supported client/server style interactions by integrating front-end components with backend APIs.
- Troubleshot production issues and resolved technical defects with minimal supervision.
- Documented system changes and technical procedures to support ongoing application maintenance.
- Assisted with testing, deployment updates, and continuous application improvements.

Projects

Microservices Task Manager | *Java / Spring Boot* **November 2025**

- Designed and developed a client/server-based application using Java and Spring Boot.
- Built separate User and Task services communicating via HTTP REST APIs.
- Implemented database persistence using Spring Data JPA with structured relational databases.
- Designed normalized database schemas to ensure data integrity and maintainability.
- Created an API Gateway to centralize routing and improve system organization.

Study Buddy | *Python backend + SQLite, embeddings* **January 2026**

- Designed a local-first RAG (Retrieval-Augmented Generation) pipeline to provide context-aware course recommendations, ensuring 100 percent data privacy by processing all university data and user history on-device.
- Engineered a persistent memory system using SQLite to maintain multi-session conversation state and user preferences, implementing automated summarization logic to manage context-window efficiency.
- Developed a modular safety & validation layer that cross-references AI outputs against hard-coded prerequisite logic to prevent "hallucinated" course advice.
- Designed a responsive UI/UX that visualizes course dependencies and provides transparent "source citations" for every AI recommendation

Stratum Wealth | *Co-Founder & Cybersecurity Analyst* **February 2026**

- Co-founded an AI-powered financial intelligence platform that generates automated pre-market reports summarizing financial news, sentiment, and trading insights for users before market open.
- Implemented security-focused infrastructure practices including secure authentication flows, API protection, environment variable management, and access control mechanisms.
- Assisted in securing backend systems, deployment pipelines, and cloud-hosted services while monitoring potential vulnerabilities and improving platform reliability.

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, SQL, C++, TypeScript – Enlgish, Arabic, French
Developer Tools: VS Code, IntelliJ, VirtualBox, Git, GitHub, Linux (Ubuntu), OpenStack, SPSS
Technologies/Frameworks: Linux, , GitHub, Node.js, Next.js, SQLite, JavaFX, Pygame

Extracurricular

Kanz AI **July 2026**
Certificate of Completion *Saudi Arabia*

- Worked collaboratively in team-based environments in order to create a local AI
- Presented my own AI to other participants
- Managed multiple tasks simultaneously with minimal supervision.
